

GAMESENSE

TRAIN YOUR INSTINCT

WE HELP FACILITIES LEVEL-UP THEIR VALUE.

gameSense is revolutionizing training with a cognitive science program that trains athletes' brains and transforms their game. In a first of its kind, our app allows coaches to set cognitive drills that build an athlete's invisible skills, like pitch recognition and fast reaction times. Powered by tech and science, gameSense is designed to complement traditional training methods and take training sessions to the next level. And we've got the data to prove it: just five minutes a day improves reactive decision-making by 20%. This additional training session hones invisible skills in-between games; and accurately measures player progress and performance. The result? Athletes ready to do serious damage! This is the future of training and it starts now.

OUR MISSION: TRAIN YOUR INSTINCT

We take athletes to peak performance by building your invisible skills with cognitive drills.

HOW IT WORKS

TRAIN THEIR BRAIN, TRANSFORM THEIR GAME.

COGNITIVE DRILLS FOR INVISIBLE SKILLS:

We use science-backed techniques to improve pitch recognition, fast-decision making and reaction times.

24/7 TRAINING:

Improve their game in-between games; no matter the weather, time of day or if they're suffering illness or injury.

TRACK THEIR PROGRESS:

We measure player's baseline and track improvements with each cognitive rep; so, you can see their invisible skills improving real-time.

GAMIFICATION OF ESPORTS:

We use gamification; with features like scores, badges, leaderboards and real-world rewards that drive usage within groups.

WHY COGNITIVE SKILLS?

Traditional training focuses on developing hard skills but overlooks cognitive skills. But these skills matter. They sharpen instinct and separate the good players from the great. gameSense is another powerful tool in your lesson arsenal to help your athletes gain an edge, in just 5 minutes per day.

GIVE THEM AN UNFAIR ADVANTAGE...

- Assign drills in-between lessons and track progress
- Build cognitive skills effectively and efficiently
- Develop dangerous hitters
- Keep your athletes improving no matter the weather or injury status
- Be an early adopter of cognitive science in sport
- Add value to your facility membership

“

To be a great hitter... you have to have pitch recognition...

– Trent Mongero

OUR RESULTS ARE POWERFUL

MEANINGFUL IMPROVEMENT:

Just 5 minutes a day creates 20% faster reaction times.

RADICALLY EFFICIENT:

We improve fast-reactive decision-making skills 100x more efficiently than in-game viewing. We are a season's worth of training, with just 15 minutes a day for a week (200 at-bats).

SCIENCE BACKED:

Techniques developed in conjunction with cognitive scientists, researchers, coaches, and players.

LEVEL-UP YOUR FACILITY.
